**EXTREME-POWERFUL SHOCK # IMPACT # SCRATCH-PROTECTION!**

1 Step: Remove the protective film and attach the Ultra Glass

- Protective Film
- Adhesive layer with a special bubble-free poly-silicon surface
- Crystal-clear nano glass particle layer
- Crystallized polymer layer
- Crystal-clear nano glass particle layer
- Dirt and grease repellent layer
- Beschermfolie

2 Step: After applying the Ultra Glass remove the second protective film.

## The first (temper 8) Hi-tech laminated safety glass film!

For the first time it's possible to protect your valuable phone display effectively with a robust and ultrathin (only approx. 0.2 mm thick) temper 8 hi-tech glass film. The film is so thin, that it practically does not stand out.

At the same time avoids the brilliant and unbreakable - made in a patented manufacturing process composite structure - hurtful shards of glass, as this may occur in other glass products.

Whether you simultaneously enter a keychain in your pocket, or other metal objects come too close to the precious display, Ultra Glass is an effective barrier against mechanical scratches!

- Just apply and wipe smooth - perfect bubble-free seat!
- Extremely scratch-free, crystal clear and original detail window film!
- Moisture repellent! - Impurities simply wipe off.
- Only half as thick as absorbing plastic films!
- Absolutely skin-friendly !
